[GitHub.com/symplytheo](https://github.com/symplytheo) | [LinkedIn.com/in/symplytheo](https://www.linkedin.com/in/symplytheo)

Senior Frontend Engineer specialising in building scalable, high-performance web applications using modern JavaScript ecosystems. With experience across Vue.js, React, Next.js, and TypeScript, I've led frontend architecture decisions, collaborated cross-functionally with product and backend teams, and contributed to shipping production-grade applications used by real users. I bring a strong product mindset to engineering, focusing not just on writing clean code, but on performance, maintainability, user experience, and long-term scalability.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Vue.js, Nuxt.js, React, Next.js, React Native, TailwindCSS, SCSS, CSS Module

Backend: Node.js, Express.js, NestJS, MongoDB, REST APIs, GraphQL, Swagger, Prisma, PostgreSQL, Postman

State Management: Redux Toolkit, React Query, Pinia, Vuex, Vue-Apollo

Tools / Others: GitHub, GitLab, CI/CD, Vercel, JIRA, Notion, GoodDay, Figma, Claude Code, GitHub Copilot

EXPERIENCE

SOFT ALLIANCE AND RESOURCES LIMITED (Lagos, Nigeria)

Senior Software Engineer (Hybrid) March 2025 – Present

- Lead frontend engineering across enterprise-grade products serving government and financial institutions.
- Architect and develop SoftSuite (HRM platform) used by 10+ organisations, supporting payroll operations exceeding ₦200M+ in processed salaries.
- Build and optimise frontend systems for SoftPay, a payment processor handling ₦1B+ in monthly transaction volume, ensuring reliability, performance, and regulatory alignment.
- Engineer core UI modules for EbioVerify, a biometric verification platform used by state governments, supporting verification for 215,000+ public sector employees across Oyo, Ekiti, and Niger states.
- Lead cross-functional collaboration between product, backend, and QA teams to maintain high system stability and enterprise-grade reliability.
- Mentor engineers and enforce scalable architecture patterns that reduce regressions and improve maintainability.

Intermediate Software Engineer (Hybrid) November 2023 – February 2025

- Developed scalable frontend modules across multiple enterprise platforms, contributing to systems serving 100k+ users.
- Contributed to front-end development of SoftSuite HRM using React, Vite, and SCSS, working within a 13-member cross-functional team to elevate functionality and refine the UI/UX.
- Optimised performance of key modules by integrating Redux Toolkit for state management and React Query for efficient data fetching and caching.
- Built and maintained SoftPay frontend with Vue, Vite, and TailwindCSS; implemented dynamic transaction-tracking components using Pinia and Vue Router.
- Led front-end development of eBioVerify using React, Vite, and TailwindCSS; contributed to backend with NestJS to build and integrate REST APIs for biometric identity verification.
- Integrated advanced biometric workflows utilising AFIS (Automated Fingerprint Identification System) and Secugen fingerprint devices.

LEYWOW (Remote)

Senior Frontend Engineer (Contract) February 2025 – Present

- Architect and implement core frontend features for a sales management platform serving 1,000+ active retail users, targeting 99%+ uptime and production stability.
- Design reusable, type-safe Vue.js and TypeScript component systems to improve maintainability and accelerate product iteration.
- Collaborate with product stakeholders to refine UX flows, reduce friction, and ensure consistent feature delivery.
- Drive frontend performance optimisation and bug-reduction initiatives to support a near-zero regression production environment.

CLASSIC SYSTEM INFOTECH LIMITED (Ekiti State, Nigeria)

ICT Instructor (NYSC 22B1) June 2022 – May 2023

- Redesigned and modernised HTML, CSS, and JavaScript curriculum for hybrid learning environments, improving course-transition efficiency and learner comprehension.
- Delivered hands-on web development training to 200+ corps members during NYSC SAED programmes, equipping participants with practical frontend skills.
- Supported business growth by assisting prospective students and sponsors with technical consultations, contributing to a 35% increase in monthly net income.
- Stayed current with evolving JavaScript frameworks and frontend tooling to ensure training content aligned with industry standards.

BRISTLE, Remote (Canada)

Frontend Developer (Contract) January 2022 – May 2022

- Built modular, scalable UI components using React, Next.js, SCSS Modules, and TailwindCSS, reducing feature development time by ~25% through reusable design systems.
- Collaborated asynchronously with cross-functional stakeholders, contributing to a ~20% improvement in team delivery efficiency.
- Leveraged Vercel CI/CD pipelines to streamline deployments and reduce manual release overhead by ~10%.
- Contributed to frontend architecture discussions, prioritising maintainability, performance optimisation, and long-term scalability.

THE SIXTH AVIS (Remote)

Frontend Engineer (Contract) March 2021 – November 2021

- Translated Figma designs and prototypes into scalable frontend applications using Nuxt.js, Vuetify, Vue-Chart.js, and Leaflet, ensuring cross-browser compatibility and responsiveness.
- Partnered with backend engineers to integrate REST APIs and optimise data flow for improved application performance.
- Implemented interactive data visualisation and mapping features for the EARWAC platform to enhance user insight and usability.
- Maintained structured task documentation and sprint tracking via JIRA, ensuring transparency and predictable delivery cycles.

RAINBOW HUB (Akure, Ondo State)

Frontend Developer (Internship) April 2020 – December 2020

- Developed modular, responsive web templates using React and modern CSS techniques, accelerating project delivery by 15%.
- Translated Figma designs into functional Vue.js applications with Vuex and GraphQL integration, delivering a full feature implementation within 4 weeks.
- Improved page speed by 25% through asset optimisation, code minification, and frontend performance enhancements.
- Contributed to 6+ web projects across different industries, gaining multi-domain exposure.

HIGHLIGHTED PROJECTS

- [Leyyow](#) — Sales Management web app for small retail businesses. It streamlines operations and transforms data into actionable business insights. [Frontend - Vuejs, TailwindCSS, Typescript]
- [SoftPAY](#) — A secure payment processor that streamlines collections through versatile payment channels and efficient bulk payouts for private and public entities. [Frontend – Vue, Nuxt, TailwindCSS]
- [SoftSUITE](#) — A comprehensive HR ERP solution that automates people management, payroll, employee self-service, and performance management from hiring to retirement. [Frontend – ReactJS, NextJS, TypeScript]
- [Ebioverify](#) — A biometric employee verification solution for secure onboarding, identity management, and seamless integration with HRMS and FIS systems. [Fullstack – NestJS, React, Typescript, TailwindCSS]
- [EARWAC](#) — A web-based platform that integrates Earth Observation data and local indicators for coastal flood vulnerability assessment in West Africa. [Frontend – Vue, Nuxt]
- [CMDA Nigeria](#) — A digital platform offering resources, training, and support for Christian medical and dental professionals. [Fullstack – NestJS, React, Typescript]

EDUCATION & CERTIFICATIONS

FEDERAL UNIVERSITY OF TECHNOLOGY AKURE (Akure, Ondo State)

B.Tech – Industrial Mathematics, 2015 – 2020

NATIONAL YOUTH SERVICE CORPS (Ado-Ekiti, Ekiti State)

2022 Batch B, Stream 1, June 2022 - May 2023
